Random

Random

Generate an integer

```
use rand::Rng;
let mut rng = rand::thread_rng();
rng.gen();
```

Random

Generate an integer

```
use rand::Rng;
let mut rng = rand::thread_rng();
rng.gen();
```

Bounded generation

```
rng.gen_range(0, 10);
```

Random

Generate an integer

```
use rand::Rng;
let mut rng = rand::thread_rng();
rng.gen();
```

Bounded generation

```
rng.gen_range(0, 10);
```

```
rng.gen_range(0.0, 10.0);
```

Random

String generation

```
use rand::{thread_rng, Rng};
use rand::distributions::Alphanumeric;
fn main() {
   let rand_string: String = thread_rng()
       .sample_iter(&Alphanumeric)
       .take(30)
       .collect();
   println!("{}", rand_string);
}
```
